

Accelerate AI development with pre-qualified taskers

Skip lengthy qualification processes and access qualified AI taskers who excel at model evaluation, testing, and alignment. With AI taskers curated by Prolific, you can scale projects faster while maintaining superior data quality.

Why choose Prolific's AI taskers

Our pre-qualified participants are exceptionally skilled at:

- Reading comprehension and writing
- Systematic pattern recognition
- Multi-step instruction execution
- Creative problem-solving approaches
- Rigorous attention to detail

Accelerate your data collection

Scale with confidence and flexibility:

- Launch projects immediately with ready-to-go qualified participants
- Get better data quality and reduce iteration cycles
- Easily scale projects up or down as your needs evolve
- Increase onboarding rates by up to 3x

Ideal for high-impact AI training and evaluation tasks

Get reliable results for:

- Model evaluation and benchmarking
- Side-by-side performance comparisons
- Factuality and accuracy assessment
- Generative tasks

Getting started

1. Contact your Prolific representative to enable AI taskers for your account
2. Access AI taskers through our:
 - a. UI: Select "Find AI taskers on Prolific" under "Recruit" in study setup
 - b. API: Use the **ai-taskers** filter in our API. For more details, check out our help center [article](#)
3. Complete the rest of your setup as usual

Product availability

- Available pool size: 1,200+ qualified AI taskers
- Currently released in private beta
- For pricing and reward rate information, speak to your Prolific contact

AI taskers and study settings

- AI taskers are exclusively available as a standalone recruitment option. You cannot use custom participant groups or saved screener sets with AI taskers
- You can, however, use the Prolific prescreeners with AI taskers
- All other study settings remain the same
